

Press Release URGROUP November 2022

URGROUP UK's partnership with Sierra Wireless demonstrates why they are the Best-in-Class provider for 5G solutions in Rail.

URGROUP - a leading provider of advanced connectivity solutions are pleased to announce the extension of the relationship with Sierra Wireless to now include UR Group (UK). With the addition of the Sierra Wireless AirLink® XR80 & XR90, 5G Cellular routers, UR Group (UK) has further expanded its portfolio. Joe Matano said "By combining Sierra Wireless' high-performance, reliable devices, services, and software with our integration services and technical expertise, we can deliver industrial customers specialised solutions that address their unique connectivity requirements."

Fully Rail certified with EN50155, EN50121-3-2 & EN45545 for On-Board Mobile Comms Gateway applications, the XR80 & XR90 are designed for customers who demand the very best where high performance and secure off-train comms, independent of the public access On-Board passenger Wi-Fi are essential for process critical applications. Remote Condition Monitoring (RCM) is another application ideal for the XR80/90 range, getting valuable asset data off-train that provides actionable information for predictive maintenance with complete device-to-cloud security.

Sierra Wireless is the final part in our 5G offering which already includes Net Module (A Belden Company), Digi International and Nokia Corporation. UR Group (UK) can truly offer the Best In Class 5G solutions for Rail.

For further information please email URGROUP at uk@ur-group.com or call 01793 756980.
