Nokia and UR Group (UK) Partner to Deliver Industrial Customers Specialised Turnkey 5G Solutions

Nokia's Private Wireless Networks and its fully integrated edge-to-cloud offerings together with UR Group's (UK) vertical market expertise enabling transportation, manufacturing, defence and energy organisations to transform their operations with 5G

Swindon, U.K. — UR Group (UK), a European provider of advanced connectivity, today announced it has entered into a new Indirect Reseller partnership with Nokia (NYSE: NOK) and Nokia distribution partner, Nuvias. Together, the companies will develop specialised turnkey 5G private wireless solutions that empower transportation, manufacturing, defence, energy, and other industrial customers to transform the way they do business.

Through this partnership, UR Group (UK) will use its deep understanding of Intelligent Transportation System (ITS), Industrial IoT (IIoT) and other industrial communications use cases with Nokia's state-of-the-art portfolio of market-leading private wireless technology, including Nokia Digital Automation Cloud (DAC) and services for advanced connectivity solutions that meet the growing business-critical connectivity needs of UK based customers.

Nokia and UR Group (UK) will work together to develop high-speed 5G private wireless networks that allow enterprise customers to have secure, reliable, and low-latency solutions. In addition, these solutions will provide customers with reliable tracking capability, remote condition monitoring (RCM) and conduct preventive maintenance.

"Nokia provides UR Group (UK) with market-leading private wireless communications and edge-to-cloud solutions that we need to offer customers advanced connectivity solutions so that they can yield a high return on their investment," said Joe Matano, Managing Director, UR Group (UK). "By combining Nokia's high-performance, reliable devices, services, and software with our integrated services and technical expertise, we can deliver to industrial customers specialised solutions that address their unique connectivity requirements."

"Nokia has deployed mission-critical networks to more than 2,200 leading enterprise customers in the transport, energy, large enterprise, manufacturing, webscale, and public sector segments around the globe. We have also extended our expertise to more than 485

large private wireless customers worldwide across an array of sectors and have been cited by numerous industry analysts as the leading provider of private wireless networking worldwide. We are excited to partner with Nuvias and UR Group, providing our leading-edge 4.9G and 5G private wireless network solutions, enabling state-of-the-art digital transformation across industries.” Derek Lister, Customer Business Team Partner Head-Europe West and South

About UR Group

UR Group is an international provider of advanced connectivity solutions in IP networking, wireless, satellite, and fibre-optic based applications. We specialise in providing specialised, focused solutions in our key markets of ITS, Defence, Industrial Automation and Energy. We partner world-class manufacturers to bring ruggedised, reliable connectivity solutions with leading-edge technology which provides measurable return on investment in our customer applications, every time. Yet we understand technology alone is not enough. Through our Technology Enablement model we combine this solutions portfolio with customer-driven integrated services and internationally located and technically enabled sales teams who are placed to provide expert technology guidance. These specialist services are designed to assist our customers in successful adoption of the latest connectivity platforms, whatever the application demands. This solutions-based package brings a combined perspective which delivers real-life value to our customer programs. Our value proposition is unique in the marketplace today.
